Grand opening of new service center in Reno/USA

Reno, February 22, 2022 - thyssenkrupp yesterday opened a new service center in Reno, Nevada, for customers in the North American cement industry and other industrial sectors. It comprises 10,700 square feet of warehouse and workshop space as well as office and meeting space. The service center has a complete assembly, production and machining line, enabling it to carry out a wide range of modernization and repair work, particularly for customers in the western USA and Canada.

Mark Terry, President thyssenkrupp Industrial Solutions (USA) Inc.: "We want to be where our customers need us! thyssenkrupp already has numerous Service Centers distributed around the world. With an understanding of our local markets and clientele, we are able to react, deliver faster and reduce transport time as well as costs. The Service Center in Reno is another milestone for us here in North America!"

Reno was chosen because of its ease of access to transport parts for repair and refurbishment. Plus the Industrial Park provided excellent space, access and infrastructure. The Tahoe-Reno Industrial Center is the largest industrial park in the country and home to many global companies in a wide variety of industries. The area also provides local talent for thyssenkrupp to hire in the new service center.
