New 3,000 tpd cement production line for Turkmenistan

Turkmen Enjam has commissioned thyssenkrupp Industrial Solutions to build a second cement clinker production line at the Lebap cement plant in Turkmenistan (Koytendag region).

The new 3,000 tpd cement clinker production line is an 80% copy of the existing 1st line, also built by thyssenkrupp in 2010, and will be erected in parallel with it. For the new plant thyssenkrupp will supply the main components from crusher, raw material preparation, clinker production and storage through to cement production.
