thyssenkrupp invests in a Reno-based service center for cement and mining industry customers

thyssenkrupp Industrial Solutions (USA), Inc. is investing in a new Service Center in Reno, NV to bring field service expertise, machining, fabrication and refurbishment capabilities closer to our cement and mining industry customers in North America and especially in the western US.

Groundbreaking is slated for early 2021 for the new service center, which will provide 10,700 square

feet of workshop space. thyssenkrupp Industrial Solutions (USA), Inc. has selected Miles Construction of Carson City, NV to develop the project.

The service center will include a comprehensive assembly-fabrication-machining line. This will give us the capabilities to address customer needs with industrial mechanical equipment by providing the local expertise and the advantage of faster response and deliveries and reduced transportation costs to further strengthen our relationship with our customers.
