

thyssenkrupp

Insights_Polysius

The smartest tool for crushing hard rock.

World premiere at bauma thyssenkrupp will be unveiling its new eccentric roll crusher (ERC). With this completely new crusher type, thyssenkrupp has set new standards in the reduction of hard rock. Mine and quarry operators will benefit from increased efficiency, flexibility and dependability compared with conventional primary crushers. Want to find out just how smart the new ERC really is? Then visit us at bauma 2019. On April 8, 2019 we will be presenting the ERC to the public for the first time at our booth.
